Education

- **Dalian University of Technology** **Dalian, China**
  Ph.D., College of Computer Science and Technology *09/2014-11/2019*
  Research Interests: Natural Language Processing, Biomedical Text Mining, Deep Learning
- **Xiamen University** **Xiamen, China**
  M.S., School of Information Science and Engineering *09/2011-06/2014*
  Research Interests: Natural Language Processing, Machine Translation
- **Xiamen University** **Xiamen, China**
  B.S., School of Information Science and Engineering *09/2007-06/2011*

Experience

- **National Institutes of Health (NIH)** **Bethesda, USA**
  Postdoc Fellow, National Center for Biotechnology Information (NCBI) *01/2020-present*

Personal Statement

- My research interests include Natural Language Processing, Biomedical Text Mining, and Deep Learning. My current research works focus on biomedical text mining by developing novel deep learning methods to unstructured text data in the biomedical literature, especially for the tasks of document classification, named entity recognition and information extraction. My long-term research goal is to develop computational methods to better understand the natural language in biomedical text in order to accelerate knowledge discovery and improve health. I have multiple published papers in leading journals and conferences in biomedical informatics such as Bioinformatics, Nucleic Acids Research, and BIBM. Since 2017, I have co-authored over 25 peer-reviewed journal and conference proceedings articles.

Participations in Research Projects

- NIH funding (No. 1ZIALM091813-08): Named Entity Recognition and Relationship Extraction in Biomedicine. 2020-

- National Key Research and Development Program of China (No. 2016YFC0901902): Construction of Knowledgebase of Precision Medicine for Disease Studies. 2016-2020
- Natural Science Foundation of China (No. 61272373): Research on Implicit Knowledge Discover from Biomedical Literature. 2013-2016
